## DETAILED ACTION

### ***Claim Rejections - 35 USC § 112***

1. Claim 12 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The specification and claims as originally filed in the PCT application do not recite using the disclosed polyisobutenamine in a fuel additive for the general category of *internal combustion engines*. While exemplary embodiments including gasoline and diesel engines are mentioned, these are the only engine types discussed. Continuous combustion engines, such as jet engines, most rockets and many gas turbines are also internal combustion engines; however, no support for using the disclosed fuel additive in these types of engines can be found, and therefore the specification fails to include support for the broadened scope of "internal combustion engine."
2. Claim 2 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not understood how the structure  $[\text{CH}_2-\text{CH}_2-\text{O}]_p-\text{CH}_2-\text{CH}_2\text{OH}$  is within the definition of the parent claim for parameters  $\text{R}^1$  and  $\text{R}^2$ .

Art Unit: 1713

3. Claims 1, 3-11, 13 and 14 are allowed over the prior art currently of record.
